WHAT WE DO

We provide one-stop custom silk product and fabric manufacturing services covering design collaboration, process planning, and production execution. From supplying wholesale silk fabrics to delivering finished silk goods, our goal is to transform silk — a beautiful material — into reliable products and materials in a scientific and practical way that meets real business needs.

What Makes DreamSilk a Reliable Partner

Customers choose DreamSilk not because of a single advantage, but because of our overall performance in project understanding, execution stability, and long-term cooperation.

HOW WE WORK TOGETHER

You may send us completed design files or reference materials; or just begin with a simple idea—both are fine. Whether refining an existing concept or starting from scratch, DreamSilk's design team participates based on your requirements and helps turn ideas into executable product solutions.

TYPES OF CUSTOM SILK PRODUCT PROJECTS WE SUPPORT

1

Brand Line Customization

Product line customization and extension projects for brand owners.

2

Branded Gifts & Merchandise

Custom silk products developed for gifts and brand merchandise applications.

3

Private Label / OEM / ODM

Private label, OEM, or ODM cooperation projects for channel-based clients.

4

Small-Batch & Scale-Up

Small-batch trial production followed by scale-up execution for e-commerce and cross-border projects.

5

Long-Term Production

Custom production support involving multiple specifications, repeated batches, or long-term execution.

HOW WE EXECUTE YOUR PROJECT

PROJECT ALIGNMENT

During project execution, we maintain continuous communication and confirmation at key stages such as design review and sample approval, ensuring that each step proceeds based on clearly aligned expectations.

MANUFACTURING PLANNING

Based on your specific requirements, product characteristics, and real application scenarios, we refine the production execution plan in detail. This includes fabric selection and treatment, appropriate matching of printing methods (digital or screen printing), and coordinated arrangements between equipment and manual processes across embroidery, cutting, and sewing stages.

PERFORMANCE-DRIVEN EXECUTION

All process and workflow decisions for your project are made around how the product will actually perform in use. This includes considerations such as material behavior, structural stability, surface appearance, and process tolerance, ensuring that production is executed in a controlled and repeatable manner, from confirmed standards through to final delivery.

Dream Silk

Our Clients

DreamSilk creates custom silk products for world-renowned brands

DreamSilk provides custom silk products and fabrics to 50+ countries and offers OEM/ODM support to brands, wholesalers, e-commerce sellers, and gift companies. Our products are selected by brands such as ZARA, Walmart, Burberry, MANGO, Stradivarius, Topshop, and New Look. Stable production capacity, mature customization capabilities for both finished goods and fabric supply, and a reliable replenishment mechanism allow us to maintain long-term cooperation in the global market.

Suzhou Dream Silk Co., Ltd.

DreamSilk was founded in Suzhou, one of the core silk-producing bases in China. Our goal is simple: make stable, high-quality, and mass-producible silk products and fabrics for global brands. Silk is wonderful, but making silk products consistent is hard. We have been working on this for years, improving every detail of our original goal. We focus on customized silk solutions — from finished products to fabric supply. You share your ideas, and we turn them into reliable finished goods or deliver the exact fabric you need for your own production. With a mature supply chain, OEKO-certified and 6A Grade 100% silk, strong customization ability, and factory wholesale pricing, we bring real advantages to cooperation. Choose DreamSilk, where your ideas become real silk.

DreamSilk

Customization process of silk fabric

From Raw Silk to Finished Fabric

Reeling (Filament Extraction)

Multiple silk filaments are drawn from the cocoons and combined. Because a single filament is too fine for commercial use, 3 to 10 filaments are twisted together to form a single strand of raw silk.

Winding & Doubling

To achieve the desired thickness and strength for specific fabric types, multiple raw silk strands are combined (Doubling) and twisted together (Throwing).

Twisting & Throwing

The raw silk is wound onto bobbins in a process known as "throwing." This is where the silk threads are twisted to add strength and determine the final texture of the fabric.

Customization process of silk fabric

From Raw Silk to Finished Fabric

Coning / Winding

The primary goal of coning is to provide a long, continuous length of yarn that is easy to unwind during high-speed weaving or knitting. At DreamSilk, this process is optimized to protect the delicate Grade 6A silk fibers.

Weaving

The prepared silk yarn is loaded onto high-speed industrial looms, where the longitudinal threads (warp) and horizontal threads (weft) intersect. The weaving technique dictates the fabric type (Satin Weave, Plain Weave) .

Degumming

Even after reeling and throwing, raw silk retains a significant amount of sericin, making it feel stiff and look dull. During degumming, the yarn (or sometimes the woven fabric) is washed in a mild, soapy alkaline solution.

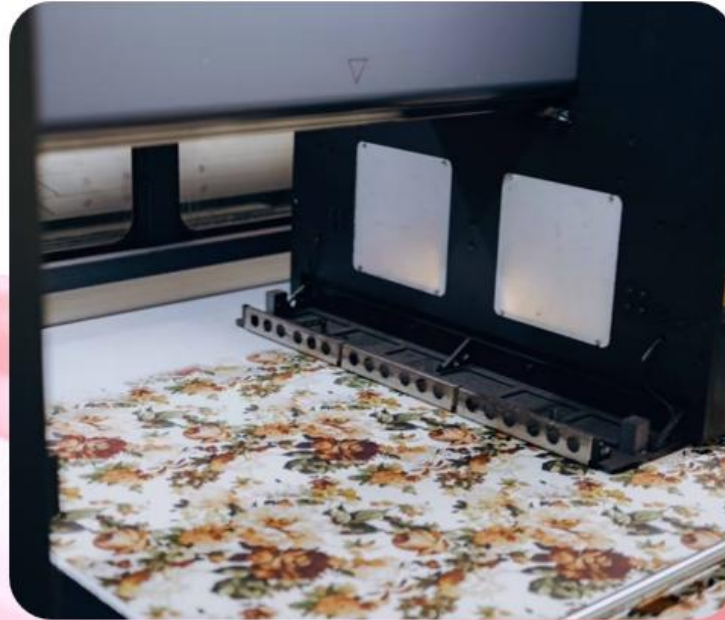

Customization process of silk fabric

From Raw Silk to Finished Fabric

Dyeing

Silk has a highly porous protein structure, allowing it to absorb dyes exceptionally well. This results in the rich, saturated colors associated with high-end silk garments.

Digital printing

Reproduces fine details, rich color gradients, and complex artwork with high accuracy. Ideal for custom printed silk scarves with intricate patterns, small-batch orders, and projects with frequent design changes.

Screen printing

Delivers strong color saturation, solid coverage, and reliable consistency across large production runs. Best suited for designs with clear color blocks and simpler compositions. A cost-effective choice for repeat orders, long-term production projects, and high-volume custom silk scarf wholesale.

Dream Silk

Customization process of silk fabric

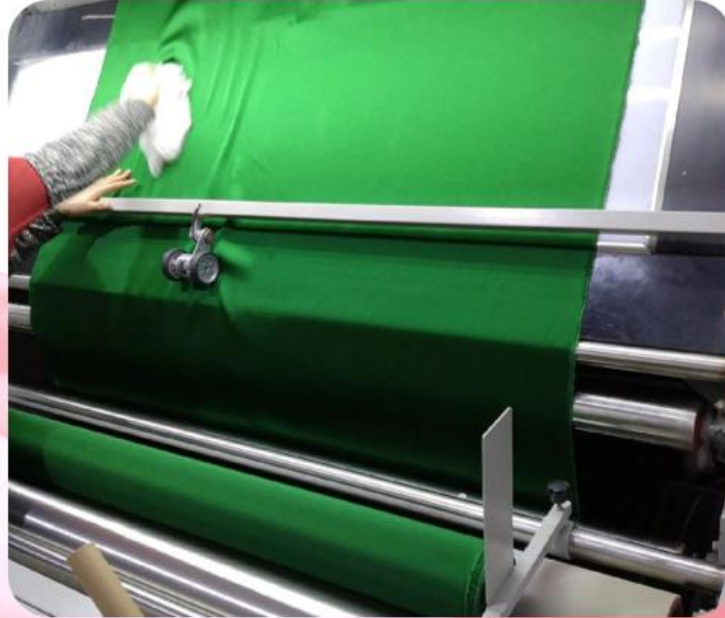

From Raw Silk to Finished Fabric

 提取文字  更多功能

Setting / Heat setting

Our finishing process includes high-precision Stenter Setting with automatic weft-straightening. This ensures that every roll of Dream silk fabric offers consistent width and superior dimensional stability, making it ideal for precision garment construction like bias cutting.

Quality Inspection

At Dream silk, every roll undergoes a rigorous 4-point inspection system. We provide detailed inspection reports including precise momme weight and width verification.

Sandwashed

Dream silk also supports a customized Sandwashed process for silk fabrics. This process does not change the protein nature of 100% mulberry silk, but it completely changes the visual and tactile experience of the fabric.

Dream Silk

Product Classification

Pure Silk Fabric – Page 10 to 21

Silk Blend Fabric – Page 22 to 25

Custom Silk Charmeuse Fabric

Plain Dyed

Customized Plain Dyed Silk Charmeuse Fabric

MOQ: 200 meters per color

Printed

Customized Printed Silk Charmeuse Fabric

MOQ: 40-50 meters (roll)

Sandwashed Silk

Customized Sandwashed Silk Charmeuse Fabric

MOQ: 40-50 meters (roll)

Advantages of Sandwashed Silk:

1. Matte finish and "peach skin" feel
2. Superior drape and wrinkle resistance
3. Enhanced skin-friendliness
4. Unique vintage feel and color depth

Undyed Silk

MOQ: 40-50 meters (roll)

Momme: 12 to 40 MM

Width: 114cm, 140cm, 250cm, 280cm.

Composition: 100% silk

Custom Silk Twill Fabric

Plain Dyed

Customized Plain Dyed Silk Twill Fabric

MOQ: 200 meters per color

Printed

Customized Printed Silk Twill Fabric

MOQ: 40-50 meters (roll)

Silk Twill Blend

Custom Silk Twill Blend Fabric

Silk wool twill

Silk Linen twill

Silk Viscose twill

Silk Cotton twill

Stretch Silk Twill

Undyed Silk

MOQ: 40-50 meters (roll)

Momme: 10 to 25 MM

Width: 114cm, 140cm,

Composition: 100% silk

Custom Silk Stretch Fabric

Plain Dyed

Customized Plain Dyed Silk Stretch Fabric

MOQ: 200 meters per color

Printed

Customized Printed Silk Stretch Fabric

MOQ: 40-50 meters (roll)

Silk Stretch Type

Silk Viscose Stretch Charmeuse
Silk Viscose Stretch Double Georgette
Silk Viscose Stretch Jacquard
Stretch Silk Georgette
Stretch Silk Double Georgette
Stretch Silk CDC
Stretch Silk Twill
Stretch Silk Charmeuse

Undyed Silk

MOQ: 40-50 meters (roll)
Momme: 16 to 22 MM
Width: 114cm, 140cm
Composition: 92–97% Silk / 3–8% Spandex

Custom Silk Chiffon Fabric

Plain Dyed

Customized Plain Dyed Silk Chiffon Fabric

MOQ: 200 meters per color

Printed

Customized Printed Silk Chiffon Fabric

MOQ: 40-50 meters (roll)

Metallic Silk Chiffon

We support the idea of combining gold and silver threads with silk to weave a fabric, which is suitable for various fashionable women's clothing.

Undyed Silk

MOQ: 40-50 meters (roll)

Momme: 4 to 12 MM

Width: 114cm, 140cm

Composition: 100% Silk

Custom Silk Crepe De Chine / Silk CDC Fabric

Plain Dyed

Customized Plain Dyed Silk
Crepe De Chine Fabric
MOQ: 200 meters per color

Printed

Customized Printed Silk
Crepe De Chine Fabric
MOQ: 40-50 meters (roll)

Sandwashed Silk

Customized Sandwashed Silk Crepe De
Chine Fabric
MOQ: 40-50 meters (roll)

Advantages of Sandwashed Silk:

1. Matte finish and "peach skin" feel
2. Superior drape and wrinkle resistance
3. Enhanced skin-friendliness
4. Unique vintage feel and color depth

Undyed Silk

MOQ: 40-50 meters (roll)
Momme: 12 to 40 MM
Width: 114cm, 140cm
Composition: 100% Silk

Custom Silk Habotai Fabric

Plain Dyed

Customized Plain Dyed Silk Crepe De Chine Fabric

MOQ: 200 meters per color

Printed

Customized Printed Silk Crepe De Chine Fabric

MOQ: 40-50 meters (roll)

Undyed Silk

MOQ: 40-50 meters (roll)

Momme: 6 to 15MM

Width: 114cm, 140cm

Composition: 100% Silk

Custom Silk Organza Fabric

Plain Dyed

Customized Plain Dyed Silk Organza Fabric
MOQ: 200 meters per color

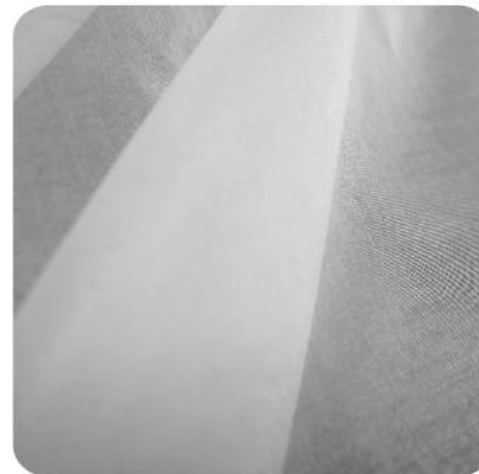

Printed

Customized Printed Silk Organza Fabric
MOQ: 40-50 meters (roll)

Stripes Silk Organza

We support custom stripes, cutouts, jacquards, embroidery, and various types of silk organza fabrics.

Undyed Silk

MOQ: 40-50 meters (roll)
Momme: 5 to 10 MM
Width: 114cm, 140cm
Composition: 100% Silk

Custom Silk Georgette Fabric

Plain Dyed

Customized Plain Dyed Silk Georgette Fabric
MOQ: 200 meters per color

Printed

Customized Printed Silk Georgette Fabric
MOQ: 40-50 meters (roll)

Embroidery

We support custom stripes, cutouts, jacquards, embroidery, and various types of silk Georgette fabrics.

Undyed Silk

MOQ: 40-50 meters (roll)
Momme: 6 to 18 MM
Width: 114cm, 140cm
Composition: 100% Silk

Custom Silk Crinkle Crepe / Silk Crespino

Metallic Silk

We support the idea of combining gold and silver threads with silk to weave a fabric, which is suitable for various fashionable women's clothing.

Printed

Customized Printed Silk Georgette Fabric
MOQ: 40-50 meters (roll)

Cut – flower

From classic floral motifs to contemporary geometric designs, we can weave your exclusive patterns directly into the fabric.

Undyed Silk

MOQ: 40-50 meters (roll)
Momme: 6 to 18 MM
Width: 114cm, 140cm
Composition: 100% Silk

Embroidery

We support custom stripes, cutouts, jacquards, embroidery, and various types of silk Georgette fabrics.

Plain Dyed

Customized Plain Dyed Silk Crinkle Crepe Fabric
MOQ: 200 meters per color

Custom Silk Velvet Fabric

Plain Dyed

Customized Plain Dyed Silk Organza Fabric
MOQ: 300 meters per color

Artisan Hand – Beaded Velvet

Our skilled artisans meticulously apply glass beads, sequins, crystals, and pearls directly onto the velvet base.

Embossed Silk Velvet

Using precision heat and pressure techniques, we stamp permanent, tactile patterns directly into the plush velvet pile.

Undyed Silk

MOQ: 40-50 meters (roll)
Momme: -
Width: 114cm, 140cm
Composition: 18% Silk / 82% Viscose
(Viscose pile on 100% silk georgette base)

Embroidered Velvet

Our manufacturing facility utilizes state-of-the-art multi-head embroidery machines for scalable, precise production, as well as offering delicate, artisan hand-embroidery options for haute couture finishes.

Devoré / Burnout Silk Velvet

The classic devoré (burnout) technique selectively dissolves the velvet pile in designated areas, revealing the sheer silk backing beneath.

Dream Silk

Custom Silk Jacquard Fabric

Silk charmeuse Jacquard

Custom Silk Charmeuse Jacquard & Stretch Silk Jacquard Manufacturing
Premium 100% Mulberry Silk Charmeuse Jacquard: Available in Pure & Stretch Blends

Silk CDC Jacquard

Our Silk CDC Jacquard elevates the classic Crepe de Chine with an intricate woven-in design. Characterized by its signature grainy texture and refined matte finish, this fabric features a double-twisted weft that provides exceptional durability and a graceful, fluid drape.

Silk wool Jacquard

We offer various blends, such as 51% Silk / 49% Wool or 30% Silk / 70% Wool, to achieve the specific weight and drape required for your collection.

Silk Cotton Jacquard

We offer popular blends such as 30% Silk / 70% Cotton (for a matte, crisp feel) or 50% Silk / 50% Cotton (for enhanced sheen and fluidity).

Silk Viscose Jacquard

Professional: Custom Silk Viscose Jacquard & Silk Stretch Viscose Jacquard Manufacturer
Luxurious Silk Viscose Blend Jacquard: The Perfect Balance of Sheen, Drape, and Comfort

Silk Linen Jacquard

Popular options include 40% Silk / 60% Linen (for more structure) or 20% Silk / 80% Linen (for maximum breathability).

Dream Silk

Custom Silk Dupioni Fabric

Plain Dyed

Customized Plain Dyed Silk Dupioni Fabric

MOQ: 200 meters per color

Printed

Customized Printed Silk Dupioni Fabric

MOQ: 40-50 meters (roll)

Embroidery

We support custom stripes, cutouts, jacquards, embroidery, and various types of Silk Dupioni fabrics.

Undyed Silk

MOQ: 40-50 meters (roll)

Momme: 16 to 40 MM

Width: 114cm, 140cm

Composition: 100% Silk

Custom Silk cotton Fabric

Silk cotton charmeuse

We specialize in various ratios, such as 25-35% Silk / 65-75% Cotton for a crisp feel, or 55% Silk / 45% Cotton for maximum brilliance. Available in 12mm, 14mm, 16mm, and 19mm equivalents to suit different garment structures.

Printed

Customized Printed Silk cotton Fabric
MOQ: 40-50 meters (roll)

Silk Cotton Plain Weave

Popular ratios include 20% Silk / 80% Cotton (for a crisp, cotton-rich feel) or 40% Silk / 60% Cotton (for added luster and softness). Available in 12mm, 14mm, 16mm, and 19mm equivalents to suit different garment structures.

Silk Cotton twill

40% Silk / 60% Cotton for a crisp, workwear feel, or 20% Silk / 80% Cotton for maximum durability and cost-efficiency. Available in 12mm, 14mm, 16mm, and 19mm equivalents to suit different garment structures.

Custom Silk Viscose Fabric

Silk Viscose Chiffon

Available in various weights, typically ranging from 6mm to 12mm equivalents, catering to different levels of transparency.

Silk Viscose CDC

We offer industry-standard blends (e.g., 30% Silk / 70% Viscose) or custom ratios tailored to your specific price point and weight requirements.

Silk Viscose charmeuse

Available in equivalents of 12mm, 16mm, 19mm, and 22mm to meet the structural needs of different garment types.
Custom Silk Viscose Stretch Jacquard

Silk Viscose Habetai

Available in popular blends like 25% Silk / 75% Viscose for maximum cost-efficiency and drape, or higher silk content for enhanced luxury.

Silk Viscose twill

We offer industry-standard blends (e.g., 30% Silk / 70% Viscose) or custom ratios tailored to your specific price point and weight requirements.

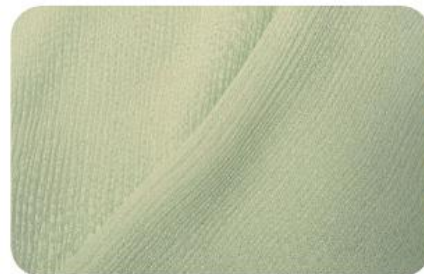

Silk Viscose Georgette

Available in various specifications, typically from 8mm to 14mm equivalents, allowing you to choose the perfect level of opacity and weight.

Silk Viscose Stretch Double Georgette

We can produce various weights, typically from 16mm to 22mm equivalents, ensuring the fabric is "non-see-through" even in lighter shades.

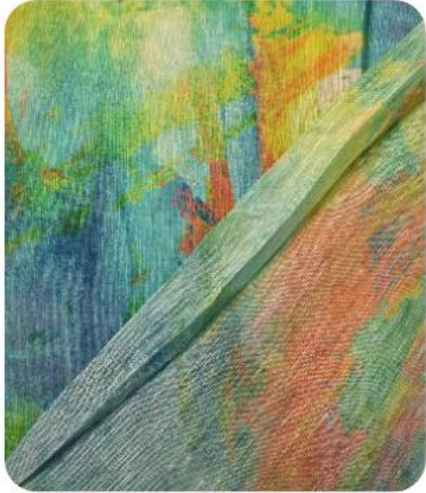

Silk Viscose Bark Crepe

We can control the intensity of the "bark" effect, ranging from subtle ripple textures to deep, dramatic crevice-like patterns.

Dream Silk

Custom Silk Linen Fabric

Silk Linen Plain Weave

Choose from 30% Silk / 70% Linen for a classic, structured linen feel, or 50% Silk / 50% Linen for enhanced softness and a more noticeable silk glow.

Silk Linen Georgette

Bespoke Fiber Ratios: Standard blends like 60% Silk / 40% Linen offer a balance of silk's soft focus and linen's crispness, but we can customize this to hit specific price points or hand-feel requirements.

Silk Linen twill

Popular ratios include 40% Silk / 60% Linen for a softer, more luminous finish, or 20% Silk / 80% Linen for a crisp, authentic linen-heavy feel.

Silk Linen Charmeuse

Available in weights ranging from 16mm to 30mm equivalents, providing options for both lightweight blouses and heavy-duty couture.

Custom Silk wool Fabric

Silk wool twill

We offer standard blends like 51% Silk / 49% Wool for a luminous finish.
Available in weights ranging from 80g/m² to 250g/m², catering to everything from lightweight shirting to heavy-duty outerwear.

Silk wool Plain Weave

Choose from 30% Silk / 70% Wool for a more "wooly," matte texture, or 50% Silk / 50% Wool for a silkier drape and higher luster.

Silk wool Crepe

We can adjust the twist of the yarns (S & Z twists) to create everything from a subtle, fine-grain crepe to a pronounced, heavy "moss" texture.

Silk wool Charmeuse

Available in heavier weights (equivalent to 22mm - 40mm silk), providing the "body" needed for garments that require structure without heavy interfacing.
